of the project that are seismic retrofitting components,	ral engineer, or architect shall certify to the building department those portions as defined by Revenue and Taxation Code section 74.5(b)(2). Upon completion the Assessor the costs of the portions of the project that are seismic retrofitting
For purposes of section 74.5(b):	
technologies. (2) "Seismic retrofitting improvements" means retrofitting from structural or nonstructural components of a cornices, hanging objects, and building cladding the	trofitting improvements and improvements utilizing earthquake hazard mitigation of or reconstruction of an existing building or structure, to abate falling hazards building or structure including, but not limited to, parapets, appendages, not pose serious danger. "Seismic retrofitting improvements" also means either research to resist seismic force levels that would otherwise be experienced by an

(3) "Improvements utilizing earthquake hazard mitigation technologies" means improvements to existing buildings identified by a local government as being hazardous to life in the event of an earthquake. These improvements shall involve strategies for earthquake protection of structures. These improvements shall use technologies such as those referenced in Part 2 (commencing with Section 1.1.1) of Title 24 of the California Building Code and similar seismic provisions in the International Building Code.

Appendix A of the International Existing Building Code of the International Code Council.

existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. "Seismic retrofitting improvements" does not include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related work performed on an existing structure. "Seismic retrofitting" includes, but is not limited to, those items referenced in
