Section 74.5 of the Revenue and Taxation Code exclude construction and reconstruction of seismic components.	s from assessment that portion	of an existing structure that consists of the
In order to receive the exclusion, this claim form must be f All documents necessary to support the exclusion must be completion of the project.		
The property owner, primary contractor, civil or structural of the project that are seismic retrofitting components, as of the project, the building department shall report to the components.	defined by Revenue and Taxation	on Code section 74.5(b)(2). Upon completion
For purposes of section 74.5		
(1) "Seismic retrofitting components" means seismic retrofitechnologies.	fitting improvements and improv	ements utilizing earthquake hazard mitigation

5 and 6 of the Uniform Code for Building Conservation of the International Conference of Building Officials.

101) of Title 24 of the California Building Code and similar seismic provisions in the Uniform Building Code.

THIS EXCLUSION EXPIRES UPON CHANGE IN OWNERSHIP OF THE PROPERTY.			
CERTIFICATION			
I certify (or declare) under penalty of perjury under the laws of the State of California that the foregoing and all information hereon, including any accompanying statements or documents, is true, correct and complete to the best of my knowledge and belief.			
IGNATURE OF PERSON MAKING CLAIM	DATE		

(3) "Improvements utilizing earthquake hazard mitigation technologies" means improvements to existing buildings identified by a local government as being hazardous to life in the event of an earthquake. These improvements shall involve strategies for earthquake protection of structures. These improvements shall use technologies such as those referenced in Part 2 (commencing with Section

(2) "Seismic retrofitting improvements" means retrofitting or reconstruction of an existing building or structure, to abate falling hazards from structural or nonstructural components of any building or structure including, but not limited to, parapets, appendages, cornices, hanging objects, and building cladding that pose serious danger. "Seismic retrofitting improvements" also means either structural strengthening or providing the means necessary to resist seismic force levels that would otherwise be experienced by an existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. "Seismic retrofitting improvements" does not include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related work performed on an existing structure. "Seismic retrofitting" includes, but is not limited to, those items referenced in Appendix Chapters
