The property owner, primary contractor, civil or structural engineer, or architect has certified to the building department those portions of the project that are seismic retrofitting components, as defined by Revenue and Taxation Code section 74.5(b)(2).	
Section 74.5 of the Revenue and Taxation Code excludes from assessment that portion of an existing structure that consists of the construction and reconstruction of seismic components.	
In order to receive the exclusion, this claim form must be filed with the assessor prior to, or within 30 days of, completion of the project. All documents necessary to support the exclusion must be filed with the Assessor by the property owner not later than six months after completion of the project.  The property owner, primary contractor, civil or structural engineer, or architect shall certify to the building department those portions of the project that are seismic retrofitting components, as defined by Revenue and Taxation Code section 74.5(b)(2). Upon completion of the project, the building department shall report to the Assessor the costs of the portions of the project that are seismic retrofitting	
components.	, and the second
For purposes of section 74.5(b):	
<ol> <li>"Seismic retrofitting components" means seismic retrofitting improvements and in technologies.</li> <li>"Seismic retrofitting improvements" means retrofitting or reconstruction of an exist from structural or nonstructural components of any building or structure inclusion cornices, hanging objects, and building cladding that pose serious danger. "Seist structural strengthening or providing the means necessary to resist seismic force existing building or structure during an earthquake, so as to significantly reduce the substantially safe ingress and egress of building occupants during and immimprovements" does not include alterations, such as new plumbing, electrical, or a seismic-related work performed on an existing structure. "Seismic retrofitting" included appendix A of the International Existing Building Code of the International Code Components utilizing earthquake hazard mitigation technologies" means improvements utilizing earthquake hazard mitigation technologies.</li> </ol>	sting building or structure, to abate falling hazards uding, but not limited to, parapets, appendages, smic retrofitting improvements" also means either levels that would otherwise be experienced by an hazards to life and safety while also providing for nediately after an earthquake. "Seismic retrofitting other added finishing materials, made in addition to udes, but is not limited to, those items referenced in council.
government as being hazardous to life in the event of an earthquake. These improtection of structures. These improvements shall use technologies such as the	se referenced in Part 2 (commencing with Section
1.1.1) of Title 24 of the California Building Code and similar seismic provisions in THIS EXCLUSION EXPIRES UPON CHANGE IN OWNERS	· ·
