EF-64-R10-0211-24000215-1 BOE-64 (P1) REV. 10 (02-11)

## CLAIM FOR SEISMIC SAFETY CONSTRUCTION EXCLUSION FROM ASSESSMENT

CLAIMANT NAME AND MAILING ADDRESS

This claim must be filed with the Assessor prior to, or within 30 days of, completion of construction.

(Make necessary corrections to the printed name and mailing address)

CLAMANITS NAME (PLEASE PRINT)  ASSESSOR'S PARCEL NUMBER.  STREET ADDRESS (IF DIFFERENT THAN MAIL INCLAMBRESS)  DATE (OR ANTICIPATED DATE) OF GOME-LETION  The property owner, primary contractor, civil or structural engineer, or architect has certified to the building department those portions of the project, that are seismic retrofitting components, as defined by Revenue and Taxation Code excludes from assessment that portion of an existing structure that consists of the construction and reconstruction of seismic components.  In order to receive the exclusion, this claim form must be filled with the assessor prior to or within 30 days or, completion of the project. All documents necessary to support the exclusion must be filled with the Assessor by the property owner not later than six months after completion of the project.  The property owner, primary contractor, civil or structural engineer, or architect shall certify to the building department those portions of the project that are seismic fetrofitting components, as defined by Revenue and Taxation Code section 74.5(b)(2). Upon completion of the project, the building department shall report to the Assessor the costs of the protons of the project that are seismic retrofitting components.  For purposes of section 74.5  (1) "Seismic retrofitting components" means seismic retrofitting improvements and improvements utilizing earthquake hazard mitigation technologies.  (2) "Seismic retrofitting improvements" means retrofitting or reconstruction of an existing building or structure, to abate falling hazards from structural or nonstructural or nonstructural components of any building or structure including, but not limited to, parapets, appendanges, cornices hanging objects, and building cladding that pose serious danger. "Seismic retrofitting improvements" das one as men plumbing, electrical, or other added finishing materials and elevations, such as new plumbing, electrical, or other added finishing materials made in additing for the substantially safe ingress and	I			I	DATE RECEIVED _

Components.  For purposes of section 74.5  (1) "Seismic retrofitting components" means seismic retrofitting improvements and improvements utilizing earthquake hazard mitigation technologies.  (2) "Seismic retrofitting improvements" means retrofitting or reconstruction of an existing building or structure, to abate falling hazards from structural or nonstructural components of any building or structure including, but not limited to, parapets, appendages, cornices hanging objects, and building cladding that pose serious danger. "Seismic retrofitting improvements" also means either structura strengthening or providing the means necessary to resist seismic force levels that would otherwise be experienced by an existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. "Seismic retrofitting improvements" does not include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related work performed on an existing structure. "Seismic retrofitting" includes, but is not limited to, those items referenced in Appendix Chapters 5 and 6 of the Uniform Code for Building Conservation of the International Conference of Building Officials.  (3) "Improvements utilizing earthquake hazard mitigation technologies" means improvements to existing buildings identified by a loca government as being hazardous to life in the event of an earthquake. These improvements shall involve strategies for earthquake protection of structures. These improvements shall use technologies such as those referenced in Part 2 (commencing with Section 101) of Title 24 of the California Building Code and similar seismic provisions in the Uniform Building Code.  THIS EXCLUSION EXPIRES UPON CHANGE IN OWNERSHIP OF THE PROPERTY.  CERTIFICATION  I certify (or declare) under penalty of perjury under the laws of the State of Cali
